

Hello, My name is

Debra Gwedeza

I am passionate about providing software solutions

About Me

I am an Electronics and Computer Engineering student with experience in IT support, digital skills training, and software development. I have practical knowledge of C/C++ and Python, which I have applied in academic projects and web-based systems like my Smart Irish Potato Disease Detection project. My background includes working in both banking and technology environments, where I configured systems, managed IT inventory, and contributed to innovative solutions for real-world problems.
